When couples are planning their special day we often wonder why they don't spend a little more time looking for a unique place to spend their wedding night. At Butler House on Grand we will make your first night special by providing a wonderful atmosphere in a welcoming environment. If you stay with us on your wedding night we will continue to offer you the same room rate every year on your anniversary. We also have two huge beautiful oak trees behind the house that share a branch. We call them the Trees in Love. As you check out in the morning we encourage you to kiss under these trees as it will give you a long married life together. Please give us a try. We would love to host you on your special night!
